## *Preface to 10th Edition*

*THIS Atlas was designed to serve as a constant elbow companion alike in the office and in the home. It aims at being informative, up to date, clear, neat in size, and convenient in arrangement. In order to retain its old reputation in these respects, the present edition has been completely remodelled.*

*The maps are entirely new in their selection, and all have been carefully brought up to date. Reference to those covering adjoining areas is simplified by the use of enclosed figures in the margin, which refer to the appropriate map page where continuation may be found.*

*The section giving important statistics for all countries of the world has been made a special feature, and includes abstracts from the latest census reports. Separate tables of other noteworthy geographical information are also given.*

*The index of over 35,000 place names will be found to be both comprehensive and simple in use.*
